

Venue operators and sponsors simply cannot risk being associated with avoidable tragedies.

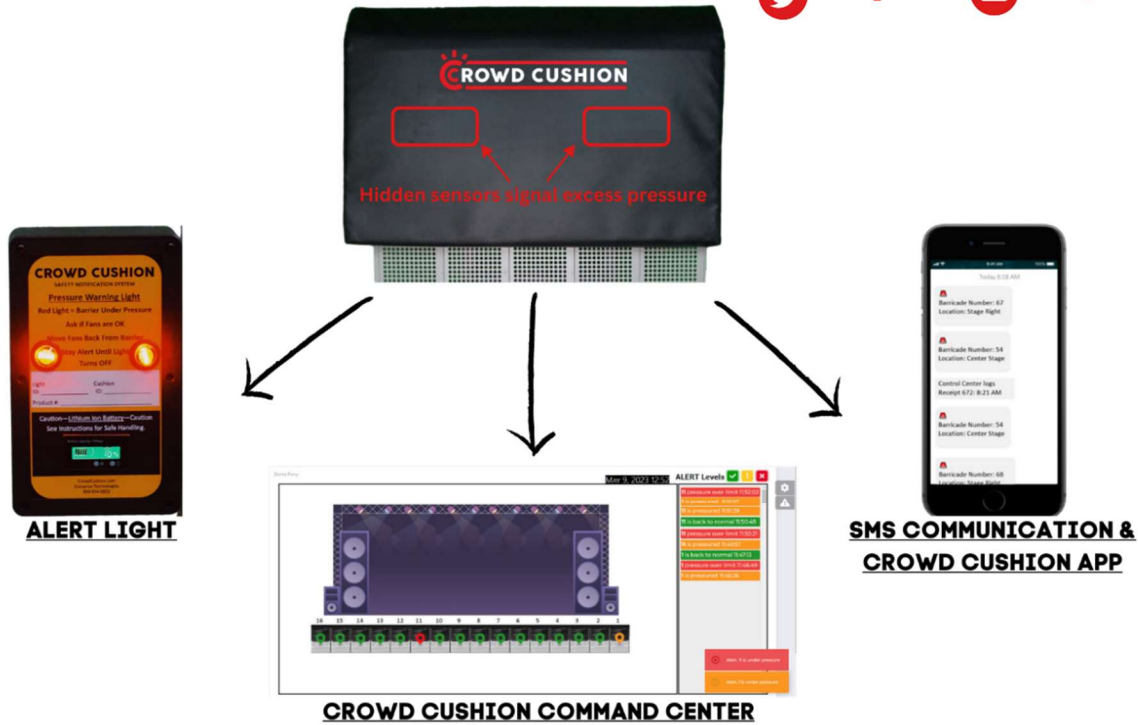

Festival goers, concert attendees and sports fans expect that *their safety is your priority*.

Crowd Cushion is a patent pending System that senses excessive crowd pressure and warns stage front security staff in time to act!

Crowd Cushion provides immediate identification of the specific barrier(s) involved in each incident and real time communication to the chain of command allowing them to quickly execute their action plan for crowd crush.

Please visit CrowdCushion.com or call us at 800-854-6822 x232 for more information or to schedule a demonstration!
